Portfolio

Overview

- Final-year Computer Science student with hands-on experience designing user interfaces for web and mobile applications. Interested in creating intuitive, visually consistent, and user-friendly digital experiences through thoughtful layouts, visual hierarchy, and navigation design. Experienced in translating project requirements into structured interfaces across social networking, estate management, AI-powered tools, and enterprise websites.

Projects

Estate Management System Demo

Tools: Figma, Canva, UI Design, Human-Computer Interaction

- Designed a complete, scrollable interface for an estate management system, organizing information into structured sections with consistent layouts, typography, spacing, and visual hierarchy.
- Focused on intuitive navigation, clear information presentation, and a consistent visual experience across the interface.

LogicLens – AI Code Intelligence Interface GitHub

Tools: UI Design, VS Code-inspired Interface, React, CSS

- Designed a familiar, developer-friendly interface inspired by VS Code for an AI-powered code dependency analysis tool.
- Organized code insights, dependency information, and analysis results into a structured interface to support readability, navigation, and ease of use.

UniMingle – Campus Social Networking App *Mobile Application Development*

Tools: UI Design, Android, Java, Firebase

- Designed the user interface for a campus social networking application focused on student interaction and campus engagement.
- Structured application screens and navigation to provide a consistent experience for accessing social features and campus-related information.

Internship / Training

BEL – Bharat Electronics Limited *(Intern)* Jun 2025 – Jul 2025

- Contributed to the design of website UI screens, including a radar-related interface, focusing on structured layouts and clear information presentation.
- Gained exposure to designing interfaces for a technical and enterprise-oriented environment while also contributing to a machine-learning project involving network intrusion and anomaly detection.

Education

B.Tech, CSE (Artificial Intelligence & Data Science) 2023 – 2027
BML Munjal University 6.25

Achievements & Certifications

- - Secured 7th position in Smart India Hackathon (SIH) 2024 by designing a game-based application with a fully functional prototype to teach children water conservation through interactive and engaging experiences.
- Completed Coursera's Figma design course and Canva design certifications.

Skills

UI/UX Design: UI Design, Wireframing, Prototyping, Layout Design, Visual Hierarchy, Typography, Color Theory, Interaction Design

AI/ML: Machine Learning, LLMs, RAG, Prompt Engineering, Computer Vision, LangChain, CrewAI
textbfTools & Platforms: Figma, Canva, Git, GitHub, VS Code, PostgreSQL, MySQL, Docker, Colab
